The importance of placing Uncontaminated and Recyclable Items Only in the recycling bins.

Placing items in the recycling bin that cannot be recycled can contaminate the recycling stream. After these unrecyclable items arrive at recycling centers, they can cause costly damage to the equipment. These items must be sorted out and the contaminated/unrecyclable items sent to the landfill. Our goal is not to send recyclable items to the landfill. This is why it is important to check with your local recycling provider to ensure that they will accept certain items before placing them into a bin.

- **Corrugated Cardboard:** Has a wavy “corrugated” or fluted strip running through the center. It is most commonly found in boxes used for packaging and shipping items.
- **Mixed Waste Paper:** Newspapers, magazines, catalogs, phonebooks, junk mail, cereal boxes or ‘slick’ cardboard, glossy paper, paper egg cartons, shredded paper, etc.

- **P.E.T.E #1 Plastics:** Clear/transparent and light green plastic water bottles, soft drink bottles or sport drink bottles.

- **H.D.P.E. #2 Plastics:** Clear or opaque plastic beverage containers, milk and juice jugs.

ALL ITEMS MUST BE RINSED OUT AND FREE OF FOOD AND LIQUIDS

Empty. Clean. Dry.
