

12.28.080 Emergency load limitations.

A. When in the opinion of the county engineer any county road will be seriously damaged or destroyed by reason of freeze and thawing conditions, or other conditions, unless the operation of vehicles thereon is restricted or the permissible weight thereof is reduced, no person shall operate upon any county road any vehicle, except an authorized emergency vehicle, with a gross weight upon any tire concentrated upon the surface of the county road in excess of the following load limitations:

RED RESTRICTIONS

Conventional Tires

Size Tire Width	Gross Load Each Tire
7.00*	1800 lbs.
7.50	1900 lbs.
8.25	2250 lbs.
9.00	2750 lbs.
10.00	2750 lbs.
11.00**	3000 lbs.

Tubeless or Special With .5 Marking

Size Tire Width	Gross Load Each Tire
8-22.5*	1800 lbs.
9-22.5	1800 lbs.
10-22.5	1900 lbs.
11-22.5	2250 lbs.
11-24.5	2750 lbs.
12-22.5	3000 lbs.

* And Under

** And Over

If vehicle has 10.00 or wider tires on the front axle and otherwise qualifies for a permit, vehicle may be allowed to have 10,000 pounds gross on said front axle under severe loading restrictions.

B. The emergency load limitations imposed by this section shall become effective upon the erection and maintenance by the department of public works of signs designating limitations at each end of the affected portion of county road, and shall remain in full force until such signs are removed at the direction of the county engineer. (Ord. PW 88-6B § 4)
